STATUS

- Open to Work
- UK Eligible
- No Sponsorship Required
- Hybrid / Remote OK

CORE STACK

- Java / Spring Boot
- Node.js / Express.js
- ReactJS / Vue.js
- React Native
- MySQL / MongoDB / Redis
- PHP / CodeIgniter
- Apache Kafka / RabbitMQ

INFRA & DEVOPS

- AWS (EC2, S3, SQS, RDS)
- Google Cloud (GCP)
- Docker · Jenkins
- CI/CD · Bitbucket / Git
- Elastic DB · SonarQube
- Firebase · Apigee

AI TOOLS

- Claude AI
- Cursor AI / Windsurf
- GitHub Copilot
- ChatGPT / Gemini AI

EXPERTISE

AI Tools	92%
Full Stack	90%
Backend	88%
AWS / Cloud	82%
Leadership	78%
Frontend	75%

LEADERSHIP

- Team of 9+ built from scratch
- Reported directly to CTO
- Hiring & onboarding
- Sprint planning & OKRs
- Architecture ownership
- Code review standards
- Agile / Scrum

// PROFILE

Senior Full Stack Engineer and Engineering Leader with 8+ years of experience designing, building and scaling high-throughput production platforms. Proven track record of leading cross-functional teams from scratch — hiring, mentoring and managing developers, QA and DevOps engineers. Architected systems that process 15,000+ orders per day, led platforms from zero to launch, and drove 3× business growth post-COVID. Deeply hands-on with AI-assisted development tools including Claude AI and Cursor AI. Fully eligible to work in the UK — no sponsorship required.

// WORK EXPERIENCE

Senior Software Engineer

Hotel Trader | *Feb 2024 – Present · Remote*

B2B API platform bridging travel agencies and hotels, serving live ARI (Availability, Rates, Inventory) data in real time to agency partners worldwide.

- Lead end-to-end development of hotel API integration platform, serving multiple travel agency clients with high-availability ARI data feeds
- Architect and manage CI/CD pipelines via Jenkins on AWS, automating deployments and reducing manual release effort significantly
- Own database management across MySQL & MongoDB — query optimisation, cron scheduling and capacity planning
- Structured logging and production observability via Elastic DB and SonarQube, improving incident response time
- Use **Claude AI & Cursor AI** daily — accelerating development cycles and maintaining high code quality

Stack: Java · Spring Boot · ReactJS · MySQL · MongoDB · AWS · Jenkins · Elastic DB · Cursor AI

Software Developer / Team Lead

Freelance | *Sep 2023 – Feb 2024 · New Delhi, India*

Contracted as lead engineer on Project Astram — a corporate infrastructure management platform — delivered independently on contract.

- Managed complete project lifecycle from requirements and architecture through to deployment and client handover
- Led team of 4 developers — sprint planning, task assignment, code reviews and delivery management
- Designed multi-tenant infrastructure management system with RBAC and real-time dashboards on AWS

Stack: Node.js · ReactJS · Express.js · MongoDB · MySQL · PHP · AWS · Docker

Associate Engineering Manager

Shypmax (Crossborder Logistech) | *Apr 2022 – Sep 2023 · Gurugram, India*

Led engineering across three products — Shypmax-Club (new build), Shypmax B2B international and Shyplite domestic — reporting directly to the CTO.

- Architected and delivered Shypmax-Club (e-commerce + C2C delivery) from zero to launch, reaching **2,000+ active users** on App Store & Play Store
- Maintained oversight of Shypmax B2B international platform processing **5,000+ cross-border orders/day**
- Drove **3× business growth** post-COVID through platform scaling, reliability improvements and rapid feature delivery
- Delivered significant AWS infrastructure cost reduction through right-sizing, API-level optimisation and DevOps automation
- Established CI/CD pipelines, code review standards, branching strategy and sprint ceremonies from scratch
- Hired and scaled engineering team from zero to **9+** across Dev, QA and DevOps — conducting interviews, setting OKRs and managing performance

Stack: Node.js · React Native · MySQL · Firebase · AWS · RabbitMQ · Apache Kafka

KEY NUMBERS

8+ Years of Experience

15K+ Orders Scaled / Day

9+ Engineers Led

3× Business Growth (YoY)

EDUCATION

B.Tech. Computer Science
Maharshi Dayanand Univ.
2013 – 2017

12th · Mathematics · CBSE
10th · Mathematics · CBSE

PREFERENCES

Lead / Arch	80%
Full Stack	80%

Front End	60%

INTERESTS

- AI-powered development
- Distributed systems
- Platform engineering
- Developer tooling & DX
- Open source contribution

APPROACH

- Ship fast, iterate faster
- Code quality over speed
- Always leave it better
- Mentor & grow the team
- Own it end to end

LANGUAGES

- English — Fluent
- Hindi — Native

PERSONAL PROJECTS

- **FinTrack** — Finance app
  fintrack.light2glow.com
- **Splitzy** — Expense splitter
  splitzy.light2glow.com
- **Dieters.fit** — Diet platform
  Node.js · Nest.js · GCP
- **NovelActing** — Android app
  Android · Firebase

// WORK EXPERIENCE (CONTINUED)

Software Developer

Shypmax (previously Shyplite) | *Mar 2019 – Mar 2022* · *New Delhi, India*

Core backend engineer on Shyplite, a domestic B2B logistics aggregator processing 15,000+ shipment orders per day. Took full ownership of architectural improvements and scaling initiatives over three years.

- Designed and implemented architectural changes that scaled the platform to **15,000+ daily orders** without performance degradation
- Built and owned core modules: Booking Engine, Finance & Billing, Real-Time Tracking, Serviceability, Warehouse Management and SKU Management
- Delivered full-stack features from DB schema design → Node.js backend APIs → Vue.js frontend interfaces
- Managed AWS infrastructure (SQS, Redis, RDS) ensuring high availability and fault tolerance under peak load
- Contributed to the engineering effort supporting the company's **3× post-COVID growth trajectory**

Stack: Node.js · Vue.js · MySQL · Redis · AWS SQS · AWS RDS · Git

Engineering Team Lead

Daphnis Labs | *Feb 2018 – Jan 2019* · *New Delhi, India*

Led a team of 4–5 engineers across 4+ simultaneous client projects.

- Managed team of 4–5 engineers — task assignment, code review and delivery management across parallel workstreams
- Key projects: Garniche (PHP/AWS), MyScoot (Node.js), Meedmi (Android/PHP)

Stack: PHP · Node.js · Android · MySQL · AWS · CodeIgniter

Software Developer → Engineer Intern

Daphnis Labs | *Feb 2017 – Feb 2018* · *New Delhi, India*

Started as Android intern, rapidly expanded into Node.js and PHP backend within 6 months.

- Delivered backend and mobile development across Node.js, PHP and Android stacks
- Key projects: Perb (Node.js/MongoDB/iOS), Denticiti (Node.js/Android), Gotcha (Unity/C#)
- Began career on FeeOnTime, TheHatke and Parking apps — building foundational REST API and mobile skills

Stack: Node.js · PHP · MongoDB · Android · iOS · Unity C# · Git

// PERSONAL PROJECTS

⚡ FinTrack

Next.js · Firebase · Gemini AI | 3 days · AI-assisted

Personal finance app — income, expenses, budgets, goals & investments. Built in 3 days using AI. Live: fintrack.light2glow.com

Splitzy

Next.js · Firebase · Gemini AI | 1 week · AI-assisted

Expense tracking & bill-splitting for groups with real-time sync. Built in 1 week. Live: splitzy.light2glow.com

Dieters.fit

Node.js · Nest.js · ReactJS · GCP | 2 years

Mobile app + dietician portal with RBAC, meal planning and progress tracking. Built over 2 years.

NovelActing

Android · Firebase | 6 months

Android novel reading app with genre categories, offline reading and Firebase real-time content sync.
