STATUS

- Open to Work
- UK Eligible
- No Sponsorship Required
- Hybrid / Remote OK

CORE STACK

- TypeScript / JavaScript
- Java / Spring Boot
- Node.js / NestJS / Express
- ReactJS / Next.js / Vue.js
- React Native
- MySQL / MongoDB / Redis
- Kafka / RabbitMQ / SQS
- PHP / CodeIgniter

INFRA & DEVOPS

- AWS · EKS · ECS · Lambda
- Step Functions · SQS · RDS
- EC2 · S3 · CloudWatch
- Kubernetes · Docker
- Terraform · IaC
- Jenkins · CI/CD · Bitbucket
- Elastic · SonarQube
- GCP · Firebase · Apigee

AI TOOLS

- Claude AI
- Cursor AI / Windsurf
- GitHub Copilot
- ChatGPT / Gemini AI

EXPERTISE

AI Tools	92%
Full Stack	90%
Backend	88%
AWS / Cloud	82%
Leadership	78%
Frontend	75%

LEADERSHIP

- Team of 9+ built from scratch
- Reported directly to CTO
- Hiring & onboarding
- Sprint planning & OKRs
- Architecture ownership
- Code review standards
- Agile / Scrum

// PROFILE

Senior Full Stack Engineer and Engineering Leader with 8+ years building and scaling distributed, high-throughput production systems on AWS. Proven track record leading cross-functional teams from scratch — hiring, mentoring and managing developers, QA and DevOps. Architected microservices platforms processing 15,000+ orders/day, delivered Kubernetes-based deployments on EKS with Terraform-managed infrastructure, and drove 3× business growth post-COVID. Polyglot across **TypeScript, Java/Spring Boot and Node.js**, with daily hands-on use of AI-assisted development tooling (Claude AI, Cursor). Based in Glasgow — fully UK-eligible, no sponsorship required.

// WORK EXPERIENCE

Senior Software Engineer

Hotel Trader | *Feb 2024 – Present · Remote*

B2B API platform bridging travel agencies and hotels, serving live ARI (Availability, Rates, Inventory) data in real time to agency partners worldwide. Joined as senior IC after AEM role to deepen distributed systems and real-time API expertise.

- Lead end-to-end development of hotel API integration platform on **AWS EKS (Kubernetes)**, serving multiple travel agency clients with high-availability ARI feeds
- Design and ship microservices in **Java / Spring Boot** and TypeScript-based React frontends, with infrastructure provisioned via **Terraform**
- Architect and own CI/CD pipelines via **Jenkins on AWS (EKS, ECS, Lambda, Step Functions)**, automating deployments and reducing release effort significantly
- Own database management across MySQL & MongoDB — query optimisation, cron scheduling and capacity planning at production scale
- Built structured logging and production observability via Elastic and SonarQube, materially improving incident response time
- Use **Claude AI & Cursor AI** daily — accelerating delivery while maintaining high code quality through review discipline

Stack: Java · Spring Boot · TypeScript · ReactJS · MySQL · MongoDB · AWS (EKS, ECS, Lambda, Step Functions, SQS) · Kubernetes · Terraform · Jenkins · Elastic · Cursor AI

Software Developer / Team Lead

Freelance | *Sep 2023 – Feb 2024 · New Delhi, India*

Contracted as lead engineer on Project Astram — a corporate infrastructure management platform — delivered independently on contract.

- Managed complete project lifecycle from requirements and architecture through to deployment and client handover
- Led team of 4 developers — sprint planning, task assignment, code reviews and delivery management
- Designed multi-tenant infrastructure management system with RBAC and real-time dashboards on AWS
- Provisioned AWS infrastructure via **Terraform**; built event-driven workflows using **Lambda and Step Functions**

Stack: TypeScript · Node.js · ReactJS · Express.js · MongoDB · MySQL · AWS (Lambda, Step Functions, ECS) · Terraform · Docker

Associate Engineering Manager

Shypmax (Crossborder Logistech) | *Apr 2022 – Sep 2023 · Gurugram, India*

Led engineering across three products — Shypmax-Club (new build), Shypmax B2B international and Shyplite domestic — reporting directly to the CTO.

- Architected and delivered Shypmax-Club (e-commerce + C2C delivery) from zero to launch in **TypeScript / Node.js**, reaching **2,000+ active users** on App Store & Play Store
- Maintained oversight of Shypmax B2B international platform processing **5,000+ cross-border orders/day**
- Drove **3× business growth** post-COVID through platform scaling, reliability improvements and rapid feature delivery
- Migrated workloads to **AWS EKS / ECS**, adopted **Lambda & Step Functions** for event-driven processing, and provisioned infra via **Terraform**
- Delivered significant AWS cost reduction through right-sizing, API-level optimisation and DevOps automation
- Established CI/CD pipelines, code review standards, branching strategy and sprint ceremonies from scratch
- Hired and scaled engineering team from zero to **9+** across Dev, QA and DevOps — conducting interviews, setting OKRs and managing performance

Stack: TypeScript · Node.js · React Native · MySQL · Firebase · AWS (EKS, ECS, Lambda, Step Functions) · Kubernetes · Terraform · Kafka · RabbitMQ

KEY NUMBERS

8+ Years of Experience

15K+ Orders Scaled / Day

9+ Engineers Led

3× Business Growth (YoY)

EDUCATION

B.Tech. Computer Science
Maharshi Dayanand Univ.
2013 – 2017

PREFERENCES

Lead / Arch	80%
Full Stack	80%
Back End	70%
Front End	60%

INTERESTS

- AI-powered development
- Distributed systems
- Platform engineering
- Developer tooling & DX
- Open source contribution

APPROACH

- Ship fast, iterate faster
- Code quality over speed
- Always leave it better
- Mentor & grow the team
- Own it end to end

LANGUAGES

- English — Fluent
- Hindi — Native

PERSONAL PROJECTS

- **FinTrack** — Finance app
  fintrack.light2glow.com
- **Splitzy** — Expense splitter
  splitzy.light2glow.com
- **Dieters.fit** — Diet platform
  Node.js · Nest.js · GCP
- **NovelActing** — Android app
  Android · Firebase

// WORK EXPERIENCE (CONTINUED)

Software Developer

Shypmax (previously Shyplite) | *Mar 2019 – Mar 2022* · *New Delhi, India*

Core backend engineer on Shyplite, a domestic B2B logistics aggregator processing 15,000+ shipment orders per day. Took full ownership of architectural improvements and scaling initiatives over three years.

- Designed and implemented architectural changes that scaled the platform to **15,000+ daily orders** without performance degradation
- Built and owned core modules: Booking Engine, Finance & Billing, Real-Time Tracking, Serviceability, Warehouse Management and SKU Management
- Delivered full-stack features from DB schema design → Node.js backend APIs → Vue.js frontend interfaces
- Managed AWS infrastructure (SQS, Redis, RDS) ensuring high availability and fault tolerance under peak load
- Contributed to the engineering effort supporting the company's **3× post-COVID growth trajectory**

Stack: Node.js · Vue.js · MySQL · Redis · AWS SQS · AWS RDS · Git

Engineering Team Lead

Daphnis Labs | *Feb 2018 – Jan 2019* · *New Delhi, India*

Led a team of 4–5 engineers across 4+ simultaneous client projects.

- Managed team of 4–5 engineers — task assignment, code review and delivery management across parallel workstreams
- Key projects: Garniche (PHP/AWS), MyScoot (Node.js), Meedmi (Android/PHP)

Stack: PHP · Node.js · Android · MySQL · AWS · CodeIgniter

Software Developer → Engineer Intern

Daphnis Labs | *Feb 2017 – Feb 2018* · *New Delhi, India*

Started as Android intern, rapidly expanded into Node.js and PHP backend within 6 months.

- Delivered backend and mobile development across Node.js, PHP and Android stacks
- Key projects: Perb (Node.js/MongoDB/iOS), Denticiti (Node.js/Android), Gotcha (Unity/C#)
- Began career on FeeOnTime, TheHatke and Parking apps — building foundational REST API and mobile skills

Stack: Node.js · PHP · MongoDB · Android · iOS · Unity C# · Git

// PERSONAL PROJECTS

⚡ FinTrack

Next.js · Firebase · Gemini AI | 3 days · AI-assisted

Personal finance app — full-stack with AI-augmented development workflow. Live: fintrack.light2glow.com

Splitzy

Next.js · Firebase · Gemini AI | 1 week · AI-assisted

Expense tracking & bill-splitting for groups with real-time sync. Built in 1 week. Live: splitzy.light2glow.com

Dieters.fit

Node.js · Nest.js · ReactJS · GCP | 2 years

Mobile app + dietician portal with RBAC, meal planning and progress tracking. Built over 2 years.

NovelActing

Android · Firebase | 6 months

Android novel reading app with genre categories, offline reading and Firebase real-time content sync.
